

Protecting Your Muscle & Energy on GLP-1 Therapy

Essential lifestyle support for patients on semaglutide, tirzepatide, or medical weight care.

THE CLINICAL RATIONALE

During rapid weight loss, up to **25% to 40% of weight lost can come from muscle** rather than fat. Preserving muscle keeps your metabolism high and prevents long-term rebound.

2-3x

Weekly Strength

WHY PRESERVING MUSCLE MATTERS

Protects Metabolism

Muscle burns calories even at rest. Protecting it makes maintaining your goal weight significantly easier.

Guards Joints & Spine

Stronger muscles absorb impact, relieving strain from sensitive knees, hips, and lower back.

Everyday Vitality

Keeps daily life effortless—carrying groceries, climbing stairs, and staying active with family.

3 COMMON ROADBLOCKS (AND HOW WE SOLVE THEM)

● THE CONCERN

"I've never lifted weights and commercial gyms intimidate me."

✓ HOW WRK HELPS

We train in a quiet, private Addington studio with only a few people around. No loud music, mirrors, or crowds. Simple, joint-friendly movements at your pace.

● THE CONCERN

"I have zero appetite and eating protein makes me feel nauseous."

✓ HOW WRK HELPS

When full meals feel impossible, we introduce gentle "protein pacing"—small, easy-to-digest whole foods and liquid options that protect muscle without nausea.

● THE CONCERN

"Some days I feel fatigued or low on energy from medication."

✓ HOW WRK HELPS

Every session is adjusted on the day. If your energy is low, we scale it right back. You are never pushed to exhaustion. Consistency beats intensity every time.

Coached by WRK Personal Training

20+ Years Coaching

Specialised Support

We work strictly within safe exercise technique and daily lifestyle habits—supporting your doctor's treatment plan without ever interfering with your medical prescriptions.

🕒 FREE 3-MINUTE ONLINE CHECK

Take the Free GLP-1 Muscle & Protein Score Assessment

Answer a few quick questions to assess your current training, protein intake, and recovery habits. You can also arrange a complimentary 20-minute discovery chat with our team at the Addington studio.
